PROFESSIONAL SUMMARY

B.Tech (AI & ML) graduate with hands-on experience building, deploying, and maintaining Python/Flask applications, REST APIs, and automated CI/CD pipelines (GitHub Actions). Comfortable with debugging, troubleshooting, and application deployment across cloud-hosted platforms (Streamlit Cloud, Hugging Face Spaces). Strong analytical and problem-solving skills, backed by SQL/database fundamentals and Git version control. Recognized for excellent written and verbal communication as a finalist at the SRKR Orator Championship, with proven team leadership and cross-functional collaboration experience. Eager to apply a strong technical foundation and fast learning ability to application maintenance and automation-driven support environments.

TECHNICAL SKILLS

Application Support & Troubleshooting: Python, SQL, Debugging, Application Deployment & Monitoring, Database Management (SQLAlchemy ORM, SQLite), Problem Solving

Automation & DevOps: CI/CD (GitHub Actions), Automation scripting, Git/Version Control

Web & API: Flask (REST API design), Streamlit, Gradio, Jinja2, Bootstrap 5, HTML5, CSS, JavaScript

Analytical & AI Foundations: scikit-learn, XGBoost, Pandas, NumPy, Data Structures & Algorithms, Object-Oriented Programming (OOP)

Professional Skills: Strong analytical and problem-solving skills, written and verbal communication, client-facing presentation experience, teamwork, cross-functional/remote collaboration, positive and customer-centric mindset

EDUCATION

Sagi Rama Krishnam Raju (SRKR) Engineering College (Autonomous) *Bhimavaram, AP, India*

B.Tech in Artificial Intelligence & Machine Learning; CGPA: 9.0/10.0 2022 – 2026

EXPERIENCE

AIMERS *Remote*

Machine Learning Intern June 2024 – August 2024

- Supported and maintained NLP model pipelines using Hugging Face Transformers, applying modular, object-oriented design for reusability and easier maintenance.
- Built and supported an AI-powered Telegram chatbot using the Google Gemini API, troubleshooting response issues and refining prompt/context handling.
- Collaborated with a remote, agile team, delivering weekly demos and technical documentation to stakeholders.

PROJECTS

HealthLink AI – Intelligent Clinical Decision Support System | *Graduation Project, 2026*

Technologies: Python, Flask, scikit-learn, scispaCy, RapidFuzz, SQLAlchemy, SQLite, Bootstrap 5, REST API, Jinja2

- Built and deployed a full-stack Flask application with real-time inference, REST API endpoints, and secure role-based access control.
- Designed the underlying database and ORM layer (SQLAlchemy, SQLite) to support reliable application operations.
- Optimized application performance through preprocessing, feature engineering, and hyperparameter tuning.

SalesForecast Prediction – Time Series Web Application

Technologies: XGBoost, Streamlit, GitHub Actions, Python

- Built and maintained an interactive web application, monitoring model accuracy (RMSE 0.97) after deployment.
- Implemented a CI/CD automation pipeline using GitHub Actions to handle automated retraining and real-time deployment updates on Streamlit Cloud, reducing manual maintenance effort.

Email Spam Detection Pipeline

Technologies: Multinomial Naive Bayes, CountVectorizer, NLP, Gradio, Hugging Face Spaces

- Designed and deployed an end-to-end classification pipeline achieving 97.88% accuracy as a scalable, low-latency cloud service.
- Managed deployment and upkeep on Hugging Face Spaces via Gradio, gaining practical experience with cloud application hosting and support.

ACHIEVEMENTS & LEADERSHIP

- SRKR Orator Championship: Finalist, recognized for strong public speaking, presentation, and client-facing communication skills; represented the institution at the Master Orator Championship.
- Team Leadership: Led a four-member team in developing and maintaining the HealthLink AI application as the graduation project while maintaining a 9.0/10.0 CGPA.

CERTIFICATIONS

- AI Foundations – Oracle OSI
- Data Science for Engineers – SWAYAM / NPTEL
- Design Thinking – SRKR Engineering College
